❖ Class Name: SessionManager .....	9
❖ Class Name: Order .....	9
❖ Class Name: Database .....	9

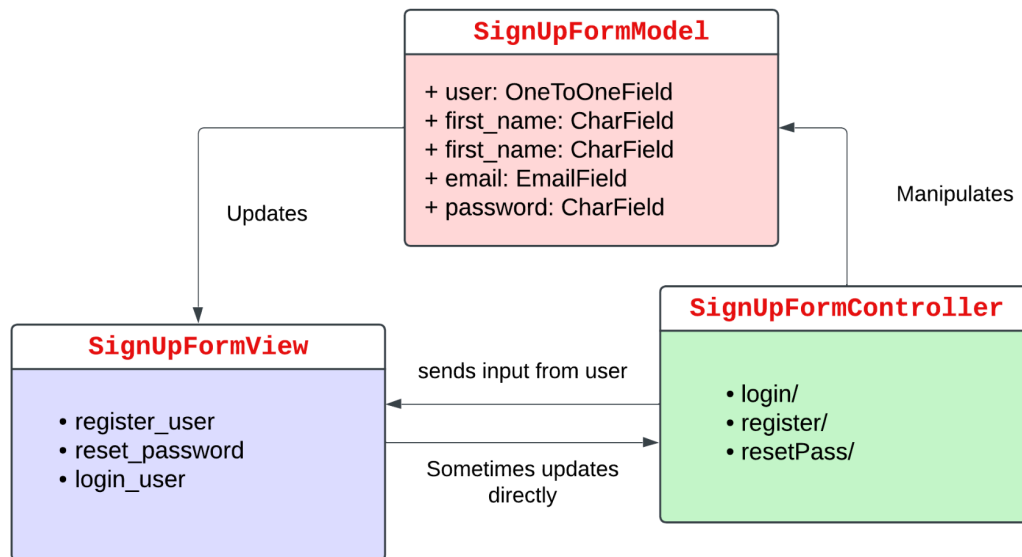

<b>Class Name:</b> Customer	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Manage user registration and login.</li> <li>• Store user data (name, email, password, etc.).</li> <li>• Authenticate users for secure access.</li> <li>• Handle password reset requests.</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• Database: Stores user information.</li> <li>• SessionManager: Manages user sessions.</li> <li>• EmailService: Sends confirmation and reset emails.</li> </ul>

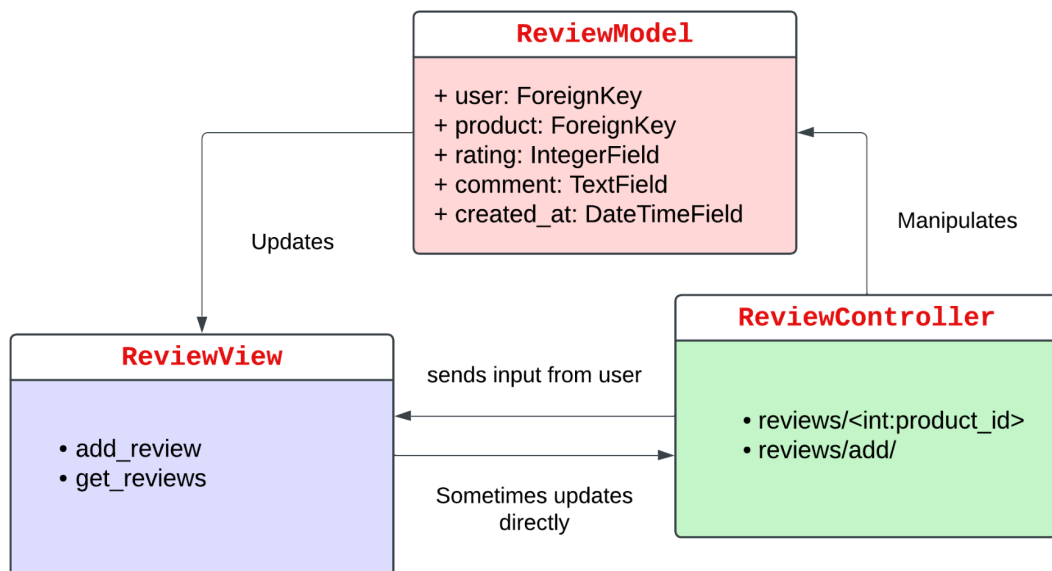

<b>Class Name:</b> Product	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Store and manage product information (name, description, price, stock).</li> <li>• Retrieve product details for display to users.</li> <li>• Handle product availability (stock status).</li> <li>• Filter and sort products based on user queries (e.g., price, category).</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• Database: Stores product information.</li> <li>• Cart: Interacts when users add products to their cart.</li> <li>• Category: Classifies products under different categories.</li> </ul>

<b>Class Name:</b> Sign Up Form	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Collect and validate user input (username, email, password).</li> <li>• Trigger user registration, login, and password reset operations.</li> <li>• Provide feedback to users (e.g., success or error messages).</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• Backend Controller: Processes the data and interacts with the database.</li> <li>• Database: Stores user credentials and personal details.</li> </ul>

<b>Class Name:</b> Review	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Display existing reviews for a product.</li> <li>• Allow users to submit new reviews with ratings and comments.</li> <li>• Validate review data (e.g., rating ranges, comment length).</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• Backend Controller: Manages review submission and retrieval logic.</li> <li>• Database: Stores and retrieves reviews associated with products and users.</li> </ul>

<b>Class Name:</b> Cart	
<b>Responsibilities:</b> <ul style="list-style-type: none"><li>● Store selected products for each user.</li><li>● Manage quantity and pricing of items in the cart.</li><li>● Provide a summary of items in the cart (total price, tax, etc.).</li><li>● Handle checkout actions.</li></ul>	<b>Collaborators:</b> <ul style="list-style-type: none"><li>● Product: Retrieves product details and ensures availability.</li><li>● User: Associates the cart with a specific user.</li></ul>

<b>Class Name:</b> SessionManager	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Manage user sessions after login.</li> <li>• Track active sessions and timeout.</li> <li>• Handle logout functionality.</li> <li>• Provide session tokens for secure user actions.</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• User: Validates and creates sessions for logged-in users.</li> <li>• Database: Stores session-related information.</li> </ul>

<b>Class Name:</b> Order	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Generate order details upon checkout.</li> <li>• Track order status (pending, shipped, delivered).</li> <li>• Store payment and shipping information.</li> <li>• Retrieve order history for users.</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• User: Tied to a specific user's order.</li> <li>• Cart: Converts cart items into an order.</li> <li>• PaymentGateway: Manages payment processing.</li> <li>• ShippingService: Tracks and updates shipping status.</li> </ul>

<b>Class Name:</b> Database	
<b>Responsibilities:</b> <ul style="list-style-type: none"> <li>• Store all data related to users, products, orders, and sessions.</li> <li>• Provide CRUD operations (Create, Read, Update, Delete).</li> <li>• Ensure data integrity and relationships (e.g., users with orders, products in carts).</li> </ul>	<b>Collaborators:</b> <ul style="list-style-type: none"> <li>• User, Product, Order, SessionManager: Uses this to store and retrieve relevant data.</li> </ul>
